/EL CURSO

Este curso está diseñado para personas que actualmente trabajan o les gustaría trabajar en la industria petrolera, concretamente en las plataformas. Al finalizar con éxito los objetivos del curso, los alumnos serán capaces de nombrar los principales componentes de las plataformas terrestres y marítimas, el vocabulario geológico clave y los principales peligros asociados a la extracción de petróleo. Se utilizarán varios ejercicios interactivos para confirmar la comprensión, así como para practicar la capacidad de escucha y responder a instrucciones y peticiones.

Al relacionar las formas escritas de las palabras con el vocabulario utilizado en el ámbito de la extracción y la exploración petrolífera, practicará los términos en los ejercicios y llevará un registro de la pronunciación que practique para controlar los progresos que realice y fomentar el aprendizaje.

Duración y lecciones del curso:

/ 12 lecciones

/ 30 horas lectivas

Tecnología que mejora el **autoaprendizaje del Inglés:**

Reconocimiento por voz

Audios MP3 descargables

Videos con Story Telling

Test de nivel por destrezas

Grupos de conversación

Certificado de aprovechamiento

Para todos los dispositivos

Speaking, reading, listening, writing

Nuestros cursos online de inglés incorporan las **últimas tecnologías** para el autoaprendizaje. Tenemos cursos para todos los niveles del Marco Común Europeo de Referencia.

/Petroleum

1- Drilling operations I:

-In this introductory lesson, students will be exposed to specific areas concerning drilling operations. There is vocabulary practice, both written and spoken exercises. Students will be able to review vocabulary definitions and sample sentences of how this vocabulary is used. Examples of vocabulary include - Christmas tree, derrick and annulus.

2- Drilling operations II:

-In the first lesson, students will be introduced to essential structures and everyday vocabulary related to both onshore and offshore drilling operations, the learner is encouraged to practice pronunciation from the very beginning. They will view content in a series of interactive exercises to promote vocabulary learning and understanding, and for reference, students will have access to vocabulary definitions which are then further reinforced by sentences showing common word usage in a sentence. To enhance vocabulary knowledge, various exercises methods such as multiple choice and fill in the blank are used to confirm understanding.

3- Emergency on an off-shore oil rig:

-In this lesson, the student will practice their understanding and comprehension by listening and following along with a typical situation in a real life situation. We will be listening to a panel of investigators reviewing information after an accident on an offshore oil drilling platform.

4- Kick back:

-In this lesson, the student will practice their understanding and comprehension by listening and following along with a typical situation in a real life situation. We will be listening to instructors informing trainees about the steps necessary to prevent typical causes of accidents on oil drilling rigs.

5- Operating a rig:

-In this lesson the student will work their freeform speaking by answering questions related to rig operations and geographic terms as well as general vocabulary usage from the course.

6- Geology and exploration I:

-In this lesson, students will be introduced to vocabulary related to the field of Geology and also the activity of exploration. Common words related to oil geology are used in sentences showing usage as well students are introduced to standard phrases from the process of exploration. They will view content in a series of interactive exercises to promote vocabulary learning and understanding and for reference students will have access to vocabulary definitions. To enhance vocabulary knowledge, exercises through various methods such as multiple choice and fill in the blank are used to confirm understanding.

7- Geology and exploration II:

-In this lesson, students will continue to expand their vocabulary about key geological terminology and standard phrases used in the area of exploration. Contents will be viewed in a series of interactive exercises to promote learning and understand. Students will also have access to definitions. Students will complete exercises of gap fill and multiple choice to assist in understanding.

/Petroleum

8- Earth study:

-In this lesson the student will work their freeform speaking by answering questions related to the study of the Earth including rock types and some chemistry terms as well as general vocabulary usage from the course.

9- Processing and final product:

-In this lesson, the student will be introduced to vocabulary related to both downstream and upstream processing as well terminology related to transport and storage of petroleum products. A series of interactive exercises will guide the student through vocabulary introducing these terms and phrases using multiple choice and fill the blank exercises. Full definitions are given and examples of the vocabulary are used in sentences.

10- Planning a new field:

-In this lesson, the student will listen to a typical situation in which the Head of Exploration explains the process of bringing a new oil field online. This listening is used to practise understanding and comprehension.

11- Making holes and producing:

-In this lesson the student will work their freeform speaking by answering questions related to the oil exploration as well as general vocabulary usage from the course.

12- Consolidation:

-This activity will further reinforce the vocabulary introduced from the lessons. Students will review all vocabulary from the course in a series of interactive exercises. This will test vocabulary comprehension and enhance vocabulary usage.
