Audios MP3 descargables

Videos con Story Telling

Test de nivel por destrezas

Grupos de conversación

Certificado de aprovechamiento

Para todos los dispositivos

Speaking, reading, listening, writing

Nuestros cursos online de inglés incorporan las **últimas tecnologías** para el autoaprendizaje. Tenemos cursos para todos los niveles del Marco Común Europeo de Referencia.

Duración y lecciones del curso:

/ 8 lecciones

/ 30 horas lectivas

/Nursing

1- The doctor's diagnosis:

Learn typical vocabulary a doctor will use in the general practice of medicine. Work with sentences using this vocabulary, and understand the medical terms in context.

4- Visiting a doctor:

Learn vocabulary related to a patient describing symptoms to a nurse/doctor. Practice with sentences learning how to describe ailments on various parts of the body.

7- Let's discuss medical professions:

Today we will discuss working in the medical professions and their associated vocabulary. Practice using the vocabulary we have discussed in the previous lessons when answering these questions. Record your answers.

2- Working as a nurse:

Learn the typical vocabulary used by a nurse in nursing school or at a hospital/doctor's office. Practice sentences using this vocabulary in the context of helping patients.

5- The specialist opinion:

Learn some of the technical vocabulary related to the specialist doctors that focus on more than the general illnesses. Use sentences to practice understanding these terms in a medical context.

8- Consolidation:

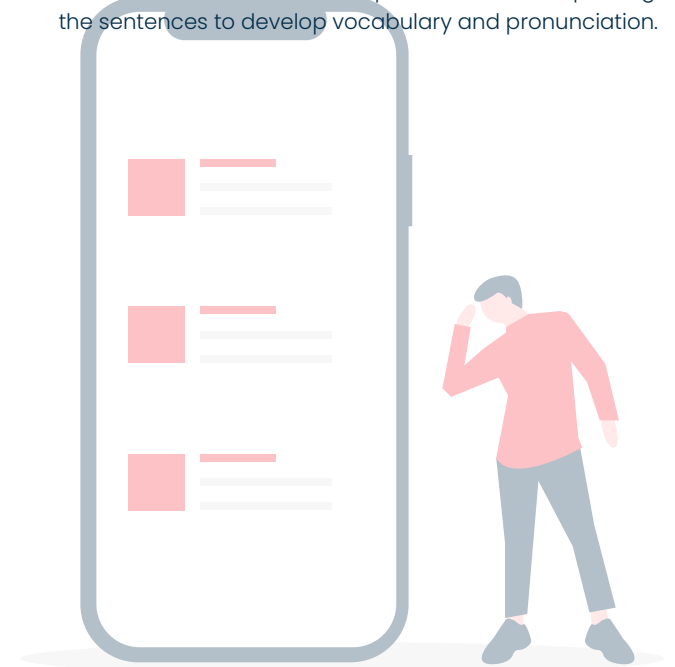

Let's review what you have learned about doctors, nurses, and patients in the medical field

3- A day in the hospital:

Study two typical situations found while working in the medical profession, including: An ambulance driver talks about his work day with another co-worker / Parents coming to talk to the nurse in the nursery. Practice listening and repeating the sentences to develop vocabulary and pronunciation.

6- At the doctor's office:

Study two typical situations related to working in a doctor's office or a hospital, including: A patient asks a nurse/doctor about his/her condition / A doctor and a nurse discuss treatment for a patient. Practice repeating the sentences to develop vocabulary and pronunciation.
